

THE MOST EFFECTIVE
ENERGY CONSERVATION
SOLUTIONS PROVIDER IN THE WORLD

STEAMPRO

THE ONLY TOTAL SERVICE COMPANY
IN STEAM ENERGY CONSERVATION

STEAMPRO PRESIDENT MESSAGE

In today's tough economic climate, companies in a wide variety of steam related industries are concerned about driving costs down and increasing their return on investment. This is important but no longer enough to maximize the effectiveness and create an effective, stable and reliable steam system.

SteamPro understands what drives your steam operations and how these drivers intersect with the realities of your steam system infrastructure. SteamPro supports the principle of a custom engineered solution through a step wise building block approach to the steam conservation design.

STEAMPRO PRESIDENT **E-HONG TAN**

GLOBAL WARMING

Recent studies point to the likelihood that climate change will have severe and undesirable effects on our environment. It can cause weather anomalies leading to dramatic events and much devastation.

The Intergovernmental Panel on Climate Change predicted a significant rise in global temperature. Global warming is at a dangerous level now and being taken seriously by governments, the media and multinational corporations.

SteamPro's patented technology can significantly reduce climate change and ensure a better living environment.

STEAMPRO MISSIONS

THE MOST EFFECTIVE STEAM ENERGY CONSERVATION
SOLUTIONS PROVIDER IN THE WORLD.

STEAMPRO TEAM

SteamPro has a dynamic and committed team with the sole mission to add value to customers and environment and with goals to help customers to stay ahead of the competition and improve bottom lines via Effective Steam Energy Conservation. SteamPro is a full service manufacturer with a dedicated and trained service team with internationally distinguished scientists and inventors on board.

STEAMPRO-A TOTAL SERVICE COMPANY

SteamPro is the only total-service company in this field which utilizes a unique technology to bring about steam and other energy savings by removing and recovering condensate. Using award-winning technology, SteamPro's innovation sets new records in savings, efficiency, safety and prolonging life-span of equipment.

Steampro differs from other steam trap vendors by being a complete solutions provider for energy conservation rather than merely supplying hardware.

SteamPro's customizable approach means that every solution we provide is unique and tailored to suit the specific and individual needs and circumstances of our customers. SteamPro can be adapted to most situations.

STEAMPRO UNRIVALLED STEAM SOLUTIONS

SteamPro is a Malaysia registered company and was endorsed by Malaysian Government. SteamPro is the world's leading-edge condensate removal & recovery system using proven technology adapted from the US Navy.

SteamPro guarantees unmatched substantial energy & maintenance savings and allows you to stay way ahead of the competition via the deployment of our productive, efficient and effective steam system.

SteamPro's proven custom engineered steam solution is designed to help you greatly reduce maintenance (parts and labor) costs with a substantial reduction in rejects whilst increasing productivity.

STEAMPRO CONDENSATE REMOVAL DEVICE

The SteamPro Condensate Removal Device (known as CRD) is specially designed for its purpose to remove the condensate immediately, completely and continuously. Its body and all its parts are made entirely of stainless steel.

We produce the units in three versions i.e. with (1) integral flanges, (2) threaded and (3) socket weld unit. The all stainless steel units have a high pressure rating of 40 kg/cm² or higher.

We do not think of our device as a steam trap. It is a Condensate Removal Device. Its primary function is to immediately, completely and continuously removes condensate as soon as it is formed, keeping steam losses at a minimum. The device has an orifice or nozzle that is completely tailored for your needs. It works under the principles of two-phase flow to maintain a small live steam loss. Most importantly, it removes all of your condensate immediately.

STEAMPRO CONDENSATE RECOVERY UNIT

To increase fuel efficiency SteamPro introduces the Condensate Recovery Unit (known as CRU) which is a condensate recovery system that is designed to operate efficiently under high temperature and pressure. The high pressure of the condensate in CRU return system reduces flash steam which is unable to return to the boiler and must therefore be discharged to the atmosphere. With the CRU, flash steam could be recovered and used to your advantage.

The unit is designed with the intention to recover and return high temperature condensate to the boiler. CRU provides a solution which will improve energy usage.

STEAMPRO CUSTOMIZES TO MEET CUSTOMERS SPECIFIC NEEDS

SteamPro configures for every Customer's Specific Factory set-up, in order to maximize the effectiveness and savings for the particular Customer.

STEAMPRO CORE VALUES

INTEGRITY

Conduct our business dealings and behavior with full integrity. (Ethical, Trusted, Pride, Reliable, Walk the Talk, "I'm my word", Loyal).

NON-STOP ADDING VALUE

Customers get more than their bargain and are better off purchasing from us. Customers' win are our win. Staff hardware and software have very much improved after joining the company.

BE BEST

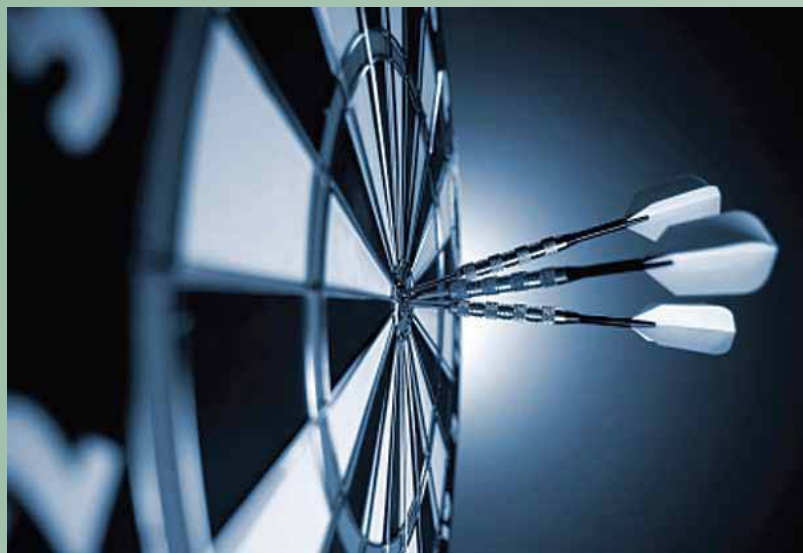

Our commitment to provide Exceptional Quality Products, Outstanding Service and Competitive Pricing in fulfilling our Customers' Requirements and Contractual Obligations. We are constantly challenged to improve the value proposition to our customers.

IN PURSUIT OF EXCELLENCE

To continually research into and develop new products that is safe and effective. To constantly empower staff to take calculated risks & stay positive minded and to participate in world renowned/proven effective training.

GREEN

We are a caring and responsible company which continually promote healthy (mind-body-soul) living and ecological friendly environment by appreciating natural resources.

IMMEDIATE BENEFITS OF STEAMPRO-FULL SYSTEM

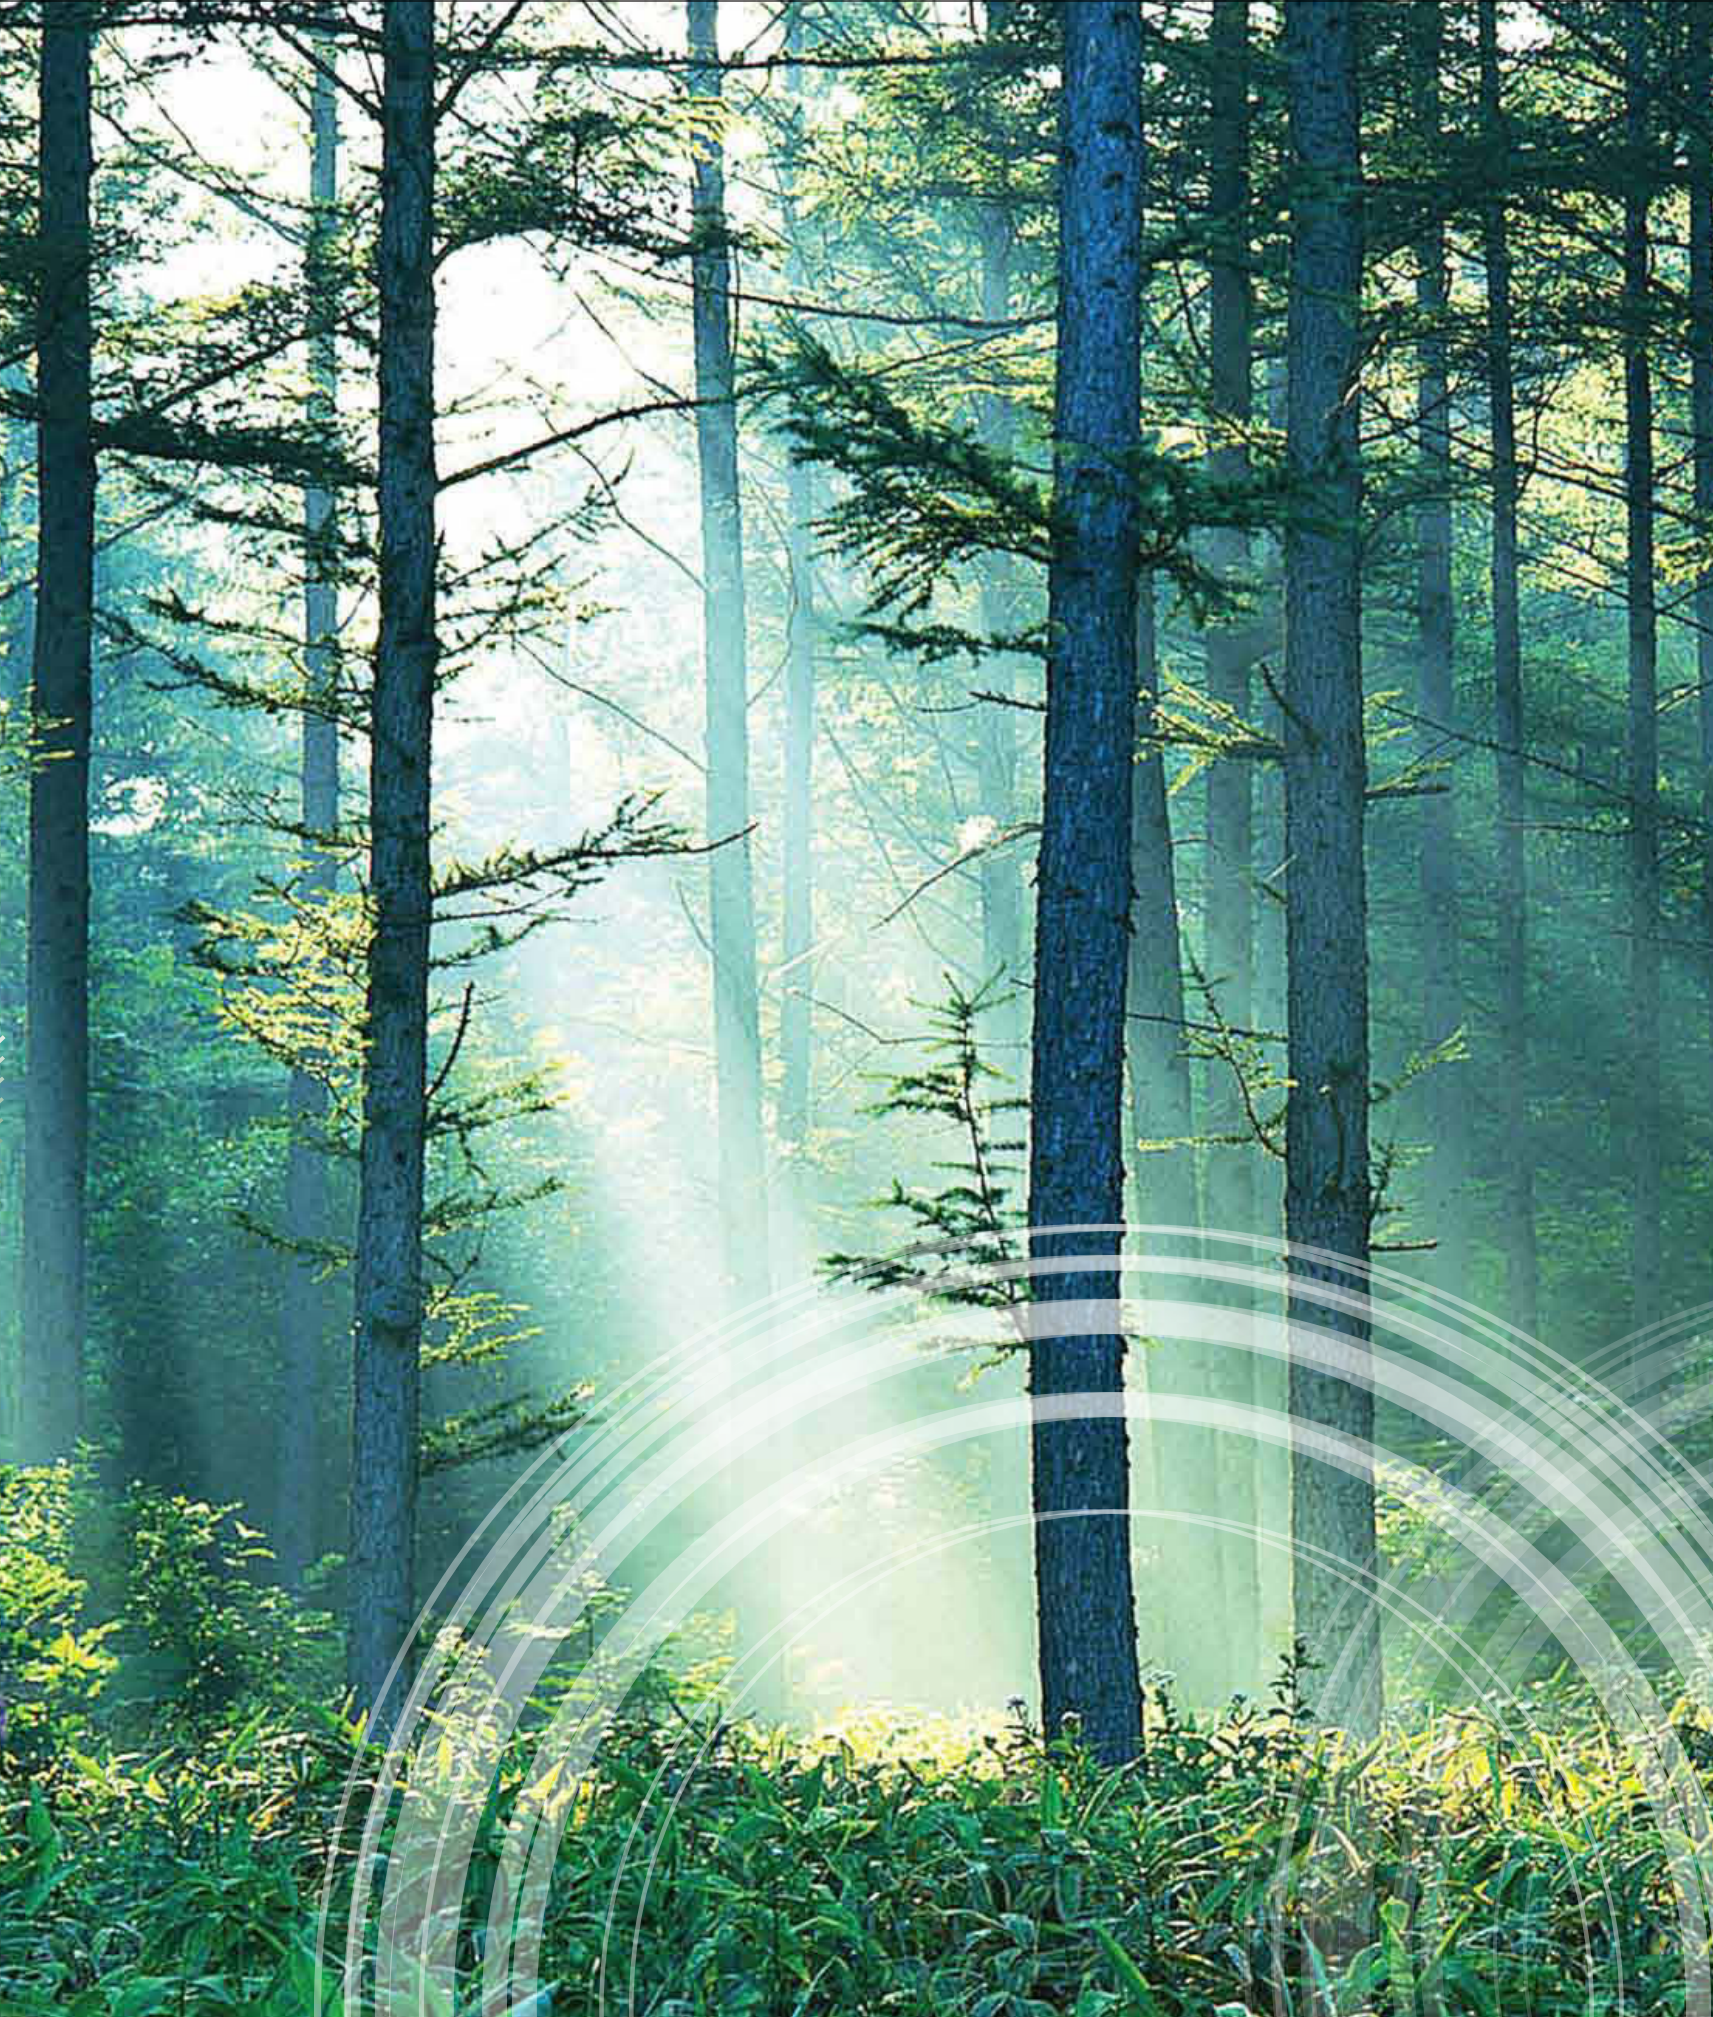

IMMEDIATE BENEFITS

STEAMPRO

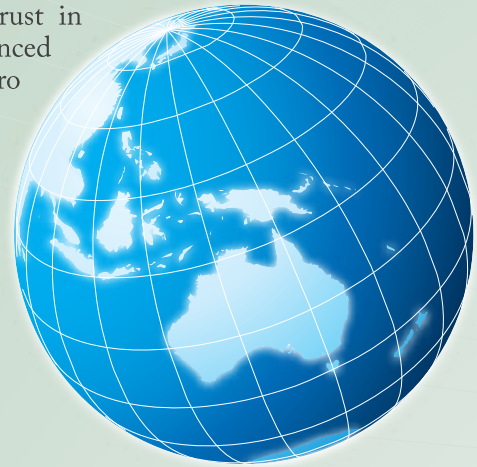

friend of mother nature by providing environmental friendly solutions

INDUSTRIES THAT STEAMPRO SERVE

A growing number of clients worldwide have already placed their trust in SteamPro. Multi-national and Fortune 500 clients have already experienced competitive advantages, benefits and unprecedented results from SteamPro solutions. We serve any industry that uses steam:

Oil & Gas	Power Plant	Oleo Chemicals
Latex Gloves	Laundry	Corrugators
Pulp & Paper	Pharmaceuticals	Hotels
Food & Beverage	Textiles	Others

A HOLISTIC ENERGY CONSERVATION SOLUTIONS PROVIDER TRUSTED
FOR ITS OUTSTANDING EFFECTIVENESS
